

Kenneth Gee

✉ kennethgee64@gmail.com 📍 San Francisco, CA 🌐 <https://www.linkedin.com/in/k3nn3th-g33/>

Skills

Languages

Java, JavaScript, Python, C++

FrontEnd

HTML, CSS, React.js

Backend

Node.js, Express.js, REST API

Cloud

AWS EC2

Developer Tools

Jira, Docker, Git

Certifications

IT Support

2024

Google

- Learned to monitor and maintain computer systems and networks
- Practiced analytical and problem-solving skills to troubleshoot and diagnose issues

Education

San Francisco State University

Fall 2021 - Spring 2024

B.S. Computer Science

Projects

AI Code Reviewer (React, Node.js, Express, OpenAI API)

- Developed an AI-powered code review platform with React, Express.js, Node.js, and OpenAI API, automating analysis of 100+ lines of JavaScript with real-time quality feedback.
- Designed a modular client-server architecture enabling secure API communication and low-latency feedback.
- Developed an IDE-style frontend using Monaco Editor with syntax highlighting and responsive UI.
- Designed a modular 2-service client/server architecture with real-time API communication

To-Do List (JavaScript)

- Built RESTful API with Node.js and Express for user authentication and todo CRUD operations.
- Integrated MongoDB for efficient data management with 30% faster query performance after schema optimization.
- Implemented secure authentication with JWT and bcrypt, enabling role-based access control and safeguarding user data.

Algorithm Visualizer (HTML, CSS, JavaScript)

- Built interactive visual representations of algorithms like Bubble Sort and Selection Sort
- Designed an intuitive UI that allows users to control the speed and type of algorithm being visualized
- Helped users better understand algorithm behavior by animating the step-by-step process of data sorting
- Demonstrated strong frontend development skills and understanding of algorithm logic

Experience

WordPress

August 2023 - December 2023

Web Development Intern

- Developed and maintained 10+ responsive web pages using HTML, CSS, and JavaScript, ensuring 99% cross-browser compatibility
- Conducted performance optimization reducing page load times by 25%.
- Created and maintained comprehensive documentation covering all key workflows
- Reduced HTTP requests and optimized assets to improve website speed and performance
